

A Full Suite Container Management Solution

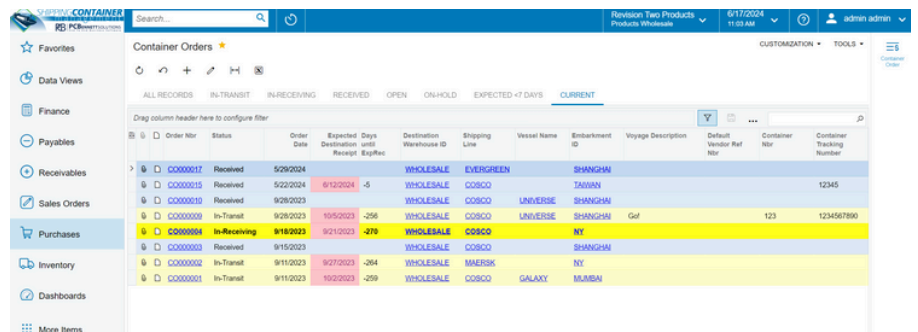

PCB|PCBENNETT

PC Bennett's Shipping Container Management

If your business imports or transfers inventory in containers and you feel that you have no visibility once the Purchase Order is issued or you don't have a way to apply landed costs to all the POs in the container, you should take a look at PC Bennett Solution's Acumatica add-on Shipping Container Management.

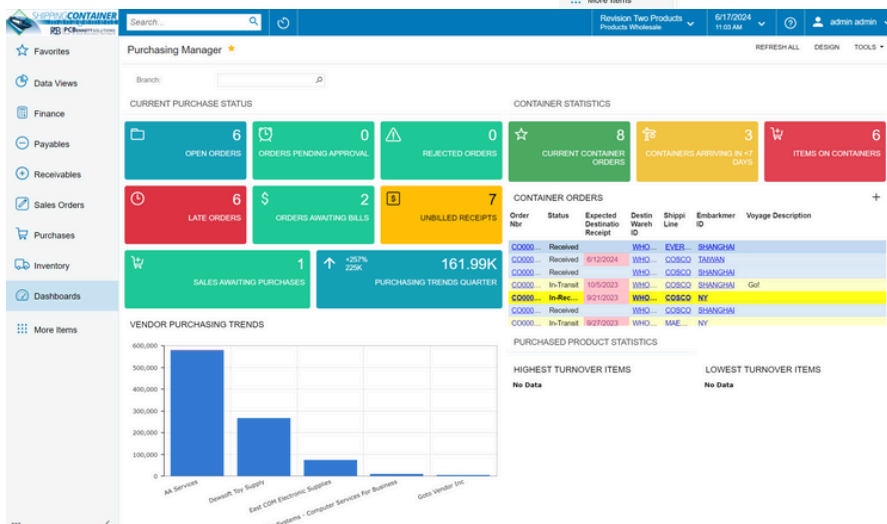

This isn't just for managing containers. You can also:

- **Perform landed cost allocation**
- **Mass process containers**
- **Leverage user-defined fields**
 - Use these fields to insert links that redirect to tracking pages, like www.vesselfinder.com and www.searates.com.
- **Always know the status of your containers with arrival dates and vessel information**

The screenshot displays the 'Container Orders' section of the software. It features a sidebar with navigation options like Favorites, Data Views, Finance, Payables, Receivables, Sales Orders, Purchases, Inventory, and Dashboards. The main area shows a table of container orders with columns for Order Nbr, Status, Order Date, Expected Days, Destination Warehouse ID, Shipping Line, Vessel Name, Embarkment ID, Voyage Description, Default Vendor Ref, Container Nbr, and Container Tracking Number. The table lists several orders, including one for 'WHOLESALE EVERGREEN SHANGHAI' and another for 'WHOLESALE COSCO TAIWAN'.

Order Nbr	Status	Order Date	Expected Days	Destination Warehouse ID	Shipping Line	Vessel Name	Embarkment ID	Voyage Description	Default Vendor Ref	Container Nbr	Container Tracking Number
C0000011	Received	5/29/2024			WHOLESALE	EVERGREEN		SHANGHAI			
C0000012	Received	5/29/2024	5/12/2024	-5	WHOLESALE	COSCO		TAIWAN		12345	
C0000013	Received	9/28/2023			WHOLESALE	COSCO		UNIVERSE			
C0000014	In-Transit	9/28/2023	10/5/2023	-256	WHOLESALE	COSCO		UNIVERSE		123	1234567890
C0000015	In-Receiving	9/18/2023	9/21/2023	-270	WHOLESALE	COSCO		NY			
C0000016	Received	9/15/2023			WHOLESALE	COSCO		SHANGHAI			
C0000017	Received	9/11/2023	9/27/2023	-264	WHOLESALE	MAERSK		NY			
C0000018	In-Transit	9/11/2023	10/2/2023	-259	WHOLESALE	COSCO		GALAXY			

PC Bennett's Shipping Container Management

Dashboards	Can report on shipping container orders once they are added into the system, featuring information like current container orders, containers arriving within X number of days, and number of items on containers.
Master Container	You can leverage the Master Order Numbers feature to manage multiple containers at one time with ease.
Priority Ranking	By using Attributes, you can create a ranking system so your internal teams are able to process containers based on the given priority, so your most important items are taken care of first.
In-Transit Inventory	By leveraging Acumatica's multiple warehouse functionality, you can create an In Transit Warehouse that your containers will "live" in as they are being transferred from one location to another. This helps businesses put the inventory on their books, so their accounting is buttoned up, while also allowing the flexibility to not count it as ready to ship to customers.
Container Receiving	As your team secures a container that was on the water or road, they are able to validate inventory against purchase orders or invoices.
Embarkment ID	Allows you to quickly filter open Purchase Orders against open containers to identify where they are in their transit. This plays a crucial role in planning when that inventory will be available for use.
Mobile App	When your team is processing shipments at the dock, they are able to use their mobile device with an internet connection to confirm quantities and report any damaged goods.
